

Department of Emergency Medicine Quarterly Update

Apr, May, June 2018

Message from the Chair

Residency and fellowship training is best accomplished in an environment rich in a diverse patient population, high academic standards, faculty feedback in real time in the clinical arena, excellent and stimulating didactics and an environment of scientific inquiry and scholarly activity. Scholarly activity involves the scholarship of discovery, application, and dissemination. The EVMS Department of Emergency Medicine is fortunate to have all of the above mentioned features. I would like to share with you some of the scholarly activity and accomplishments of the faculty and residents over the past four months.
