The Art Therapy consists of 5 semesters and spans 20 consecutive months. Art Therapy students complete 3 full semester community based practicums (2 weeks) and internships (13 weeks). Art Therapy Interns complete experiences with supervised, direct patient care in various mental health disciplines, which form the basis of the professional socialization process and adaptation to the role and functions of an art therapist. This development is only possible through the generosity of clinical preceptors (on-site supervisors).

The specific clinical practice experiences include:

- **Adult Internship (ages 18 and up)**
  - Psychiatric Hospitals, acute, residential, and long psychiatric facilities, state psychiatric facilities, adult shelters for domestic violence and homelessness, hospice and palliative care, the Veteran’s Administration Hospital, military families, adult day care and day treatment, and assisted living facilities

- **Adolescent Internship (ages 13-21)**
  - Psychiatric Hospitals, acute, short term and long term residential facilities, group homes, in-home, day treatment, alternative schools serving ASD, ID, EBICS, ED, LD, and behavior disordered youth, youth shelters for homelessness, crisis, outpatient, detention centers, family shelters for homelessness and domestic violence, the Children’s Hospital, and other community services

- **Child Internship (ages 3-12)**
  - Psychiatric Hospitals, acute, short term and long term residential facilities, in-home, day treatment, alternative schools serving ASD, ID, EBICS, ED, LD, and behavior disordered children, Children’s Hospital, area Catholic schools, family shelters for homelessness and domestic violence, and other community services.
