POLICY ON RESIDENT BOOK/LOUPE FUNDS
June 2012

The faculty of the EVMS Department of Otolaryngology-Head and Neck Surgery recognize the high cost of books and surgical loupes required for residents to satisfy the didactic and surgical training in the program. In order to defray these costs the department will purchase one major textbook of otolaryngology and one pair of surgical loupes for each resident entering the program at the conclusion of the requisite general surgery year (R1). The Residents choice of textbook must be approved by the Chairman or Program Director.
