Lot 31 Staff	CHKD/EVMS/SNGH/NDPH	Staff	AVItag or Remote	Decal Controlled

The new automatic vehicle identification (AVI) system is activated by a windshield sticker tag (AVItag). The AVItag functions as an antenna to transmit account information needed to verify privileges and activate gates for hands free entry. Traffic flow is significantly improved by reducing the delays required by the location and presentation of a parking card. Administration of facilities is improved by a real time central management system capable of monitoring loads, remote gate diagnostics and control, allowing parkers access to more than one lot and use of more than one vehicle.
