## LEARNING OBJECTIVES

- Utilizing cytogenetic and molecular markers, determine diagnosis and prognosis of Acute Myeloid Leukemia.
- Identify different subsets of Acute Lymphoblastic Leukemia and manage Ph-positive patients using salvage strategies.
- Analyze current data of FDA-approved CAR-T therapies and potential applications.
- Choose the right screening test for porphyria and determine when second line testing is needed.
- Define risk factors for progression in smoldering myeloma, including the role of cytogenetic abnormalities.
- Recognize and determine appropriate management for serious complications of sickle cell disease in adults using the current guidelines.

## FACULTY

### COURSE DIRECTOR:

*Burton Alexander, MD*  
Virginia Oncology Associates

#### **Michael Keng, MD**
