Application Procedures
Prospective students must submit the following information to be considered for admission:
- Online application form and application fee
- Official transcripts from the registrar of all colleges and universities attended
- GRE and TOEFL scores sent directly from the testing agency
- Three letters of recommendation, preferably from faculty at colleges attended by the applicant

All application materials, including test scores and transcripts, must be received no later than June 1:

School of Health Professions

Overview
The Biomedical Sciences Research Master’s Program at Eastern Virginia Medical School (EVMS) provides students with laboratory experience and a strong foundation of biomedical science knowledge.

Key advantages of this program:
- Broad, interdisciplinary curriculum
- Personalized program of study
- Close interaction with the faculty
- Research focus areas include:
  - Cancer
  - Cardiovascular Biology
  - Diabetes
  - Infectious Disease
  - Neuroscience
  - Reproductive Biology

Educational Format
The Biomedical Sciences Research Master’s Program is a two-year graduate degree program focused on translational aspects of the Biomedical Sciences. Our new curriculum emphasizes principles of translational biology through an integrated set of core courses over the first year and a half of the program. The courses move from understanding the molecular building blocks with paired relevant laboratory techniques through the development of individual projects that concentrate on translational biology from bench to bedside. During their second year, students take advanced elective coursework in their area of concentration and focus on laboratory research.

Our graduates are prepared to use cutting-edge technologies to bridge the gap between discovery in biomedical sciences and application to medicine. Graduates go on to careers in research in universities and colleges, the pharmaceutical industry, biotechnology companies and government. Outstanding graduates pursue additional training to obtain professional (MD, DO, PA) or academic (PhD) degrees.

Admission Requirements
- A Bachelor’s degree with a 3.0 GPA or higher is preferred.
- Competitive scores from the Graduate Record Examination (GRE) and Test of English as a Foreign Language (TOEFL; international applicants only)
- College-level courses in biology, physics, chemistry and mathematics
