

Announcing *Physician Assistant Clinics*, a new Clinics Review Articles series from Elsevier

Physician Assistant Clinics offers **in-depth clinical review articles** written **by PAs for PAs**.

Physician Assistant Clinics, the newest series in the Clinics Review Articles family, continues the Clinics tradition of providing **insights from today's most preeminent clinical thought leaders** in your field.

Save time and money – each issue is developed by PA experts who synthesize the latest and most relevant primary research and medical evidence to provide timely, in-depth review that allow educators and researchers to continuously and comprehensively **keep up with advancements in PA practice**.
